Subject: Preliminary SVOC GCMS Chem Data
Attachments: TCRS_preliminary SVOC GCMS Chem Data.xlsx

Hi Kent,

Attached is a spreadsheet containing a highly condensed and filtered comparison of NIST database matches for [REDACTED] and [REDACTED]. The list match tab contains chemicals that match the proposed analyte list and indicate whether they are in one or both samples. The Common non-matched tab is a list of chemicals found in both samples that do not match with the proposed analyte list. The Unique tab show which chemicals were found to be unique to either the samples or the proposed analyte list and is sorted as such. Please let me know if there are any aspects you would like to investigate further or if you have any questions.

Scott
